

Education Passages

415 Lincolnville Avenue
Belfast, ME 04915

Super Bowl Sunday – February 1, 2009

As I sit watching Super Bowl 43, I thought I'd provide a brief update on our plans for the 2009 TransAt:

Our plans for the coming summer are moving along well. Many of you saw the segment on WABI-TV news Friday, January 23. In addition, there have been some spots on the local radio. These included coverage of Dick's visit to the Belfast Area High School where he met with the 2009 Creative Problem Solving Class (pictured below) to discuss details of their plans to circumnavigate the Atlantic in the own boat from **Educational Passages**.

On Monday, January 26, Dick delivered the newest version of **Educational Passages's** hull and keel to Holland's Boat Shop, Inc. in Belfast. This new design (pictured below in Holland's Boat Shop, Inc.) will serve as the "plug" for the mold that they are making so that

multiple fiberglass hulls and keels may be cast at the Mid-Coast School of Technology in Rockland in the coming months.

Many changes have been made to the newest hull and keel design, including our raising the bow by 2 inches to improve the boats heavy weather sailing capabilities.

While at Holland's Boat Shop, Dick also took the other picture below.

As many of you know, Holland's Boat Shop was opened in 1972 by Glenn Holland, who has been active in Maine's boat building industry

and lobster boat racing ever since. **Educational Passages** could not have chosen a better place to create the master bold for this year's hull and keel.

Stay tuned for future news and updates for our exciting 2009 season!
